These are pictures of Sheinton Street, right side of road as you go towards A4169 junction. The road was marked by the contractors for repair in 19 places back in early August and nothing has been done since. The road has deteriorated further since then and there are places where the tarmac is starting to break away and we have a 2cm gap appearing. If we have further flooding this will add to the situation and we will get more wheel spray into our houses.
